

Processing up to 900kg [2,100 lbs] p/m

MODEL: FD-30ML

Make food waste easy to process with our bio-dehydrator. Use it as a soil amendment, send it to a compost facility, or dispose of it responsibly.

Load your food waste into the machine where it is macerated and heated to a point where the moisture is extracted from the reactor drum. The machine then condenses the steam and discharges a clear water condensate (no total suspended solids!). The remaining dry output is 80-90% volume-reduced, inert, pathogen free, compostable product with a variety of uses.

This is our smallest model. Designed for smaller commercial kitchens or food processors. It can handle up to 30kg (70lbs) of food waste per cycle. You can get two cycles per day. Single button operation.

CAPACITY:	30kg / 70lb (per cycle)
LENGTH:	802mm / 31.59in
DEPTH:	752mm / 29.62in
HEIGHT:	931mm / 36.64in
CYCLE TIME:	9-11 hours

Note: figures may vary due to psychrometrics as air density (height above sea level), air temperature, humidity etc.

Note: Specifications of all models may be changed without prior notice

** ML designates "Manual Load" **AL designates "Automatic Load"

** Approximate capacity daily and capacity per cycle is a range and not to be construed as an exact calculation as the bio reactor drums are a fixed volume, but density and moisture content of food waste varies.

** 1CMM = 1CFM * 35.3/ 1CMM = 35.3CFM
