

Processing up to 3,300 lbs [1,550kg] p/m

MODEL: HGF-110ML

Make food waste easy to process with our bio-dehydrator. Use it as a soil amendment, send it to a compost facility, or dispose of it responsibly.

Load your food waste into the machine where it is macerated and heated to a point where the moisture is extracted from the reactor drum. The machine then condenses the steam and discharges a clear water condensate (no total suspended solids!). The remaining dry output is 80-90% volume-reduced, inert, pathogen free, compostable product with a variety of uses.

Designed for smaller commercial kitchens or food processors. It can handle up to 110lbs (50kg) of food waste per cycle. You can get two cycles per day. Single button operation.

CAPACITY:	110lbs / 50kg (per cycle)
LENGTH:	31.59in / 802mm
DEPTH:	29.62in / 752mm
HEIGHT:	45.69in / 1161mm
CYCLE TIME:	10-12 hours

Note: figures may vary due to psychrometrics as air density (height above sea level), air temperature, humidity etc.

Note: Specifications of all models may be changed without prior notice

** ML designates "Manual Load" **AL designates "Automatic Load"

** Approximate capacity daily and capacity per cycle is a range and not to be construed as an exact calculation as the bio reactor drums are a fixed volume, but density and moisture content of food waste varies.

* 1CMM = 1CFM * 35.3/ 1CMM = 35.3CFM
